Experience

June-2024 – Present

NexaVista Technologies

Full Stack Developer

I work as a **Full Stack Developer**. I build websites using HTML, CSS, JavaScript, **React.js**, and **Next.js** for the front end. For the back end, I use **Node.js**, **Express.js**, and **MongoDB**. I help solve technical problems, improve features, and make the development process more efficient. I also keep track of my work to help the team stay organized and improve project outcomes.

Projects

- **Developed and maintained production-ready web applications** at Nexa Vista Technologies for real-world clients.
- **Personal Portfolio Website** – Showcased skills using Next.js and modern UI/UX practices.
- **Task Manager App** – Built with React.js, implementing both Context API and Redux Toolkit for state management.
- **User Authentication System** – Implemented secure signup, login, password reset, and email verification features.
- **Counterfeit Medicine Verification Web App** – Final Year Project using real-time QR code validation and database integration to detect fake medicines.

Education

2020 – 2024

SZABIST University

Bachelor of Computer Science

Earned a Bachelor's degree in Computer Science with a focus on programming fundamentals, data structures, and practical software development skills.
